1. Applicant's election with traverse of species II, claims 1-4 in the paper filed February 25, 2005 is acknowledged. The traversal is on the ground(s) that all species have already been considered. This is not found persuasive because such in no way indicates the various species to be patentably indistinct from each other, as required to overcome a species requirement, and the restriction is maintained.

The requirement is still deemed proper and is therefore made FINAL.

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, line 7, "to maintain a predetermined suture/pledget orientation" is indefinite, as no pledget is positively defined so as to provide any orientation between a suture and a pledget.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Erickson (3,819,039). Claims 1-4 are finally rejected under 35 U.S.C. 102(b) as being anticipated by Zatarga (5,582,288). Each discloses an apparatus inherently capable of fixating a suture in a substantially perpendicular orientation relative to a pledget, the structure claimed comprising a block (10; 18; respectively) having at least one slit (22-25; 22) to engage a portion of a first end portion of a suture (at or near 13; top of 18 in the Figure) and at least a portion of a second end of the suture (at or near 14; bottom of 18 in the Figure) so as to maintain a suture/pledget orientation should a suture and pledget be secured thereto. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

As to claim 2, each discloses the at least one slit capable of maintaining a parallel relationship between end portions of the suture (the end portions being arbitrary).

As to claim 3, each discloses multiple slits in the block.

As to claim 4, each discloses a first face (15; shown upper side), a second face (16; shown lower side) and a top face (11; containing the slits).

6. Applicant's arguments filed February 25, 2005 have been fully considered but they are not persuasive. Since claims 1-4 do not include a suture nor a pledget, but

encompass structures absent a suture and pledget that could so act, the arguments relative to an arrangement and structure of the pledget and suture are not convincing.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

8. This application contains claims 6-8 and 10-19 drawn to an invention nonelected with traverse in the paper of February 25, 2005. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
